DETAILED ACTION

Allowable Subject Matter

1. Claims 3-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: the present invention features method and apparatus for a dynamic memory management with an object-oriented program.

Closed related prior art:

US 6,701,420 (Hamilton et al) teaching memory management system and method that quickly allocate and reuse memory for storage of data wherein a memory manager allocates memory without information regarding the amount of memory that is to be required while minimizing system-level memory allocation calls and maximizing the contiguity of the allocated memory which is used.

US 5,784,698 (Brady et al) teaching apparatus for dynamically allocating memory including allocating a buffer from a free buffer pool memory whose associated selection size parameter is a next larger value than the buffer space that was requested.

However, none of the prior art of record teaches or suggests, the features of the claims:

(claims 9 and 13) allocating a large object over a predetermined threshold to a node which is made by coalescing a plurality of nodes to be same as a size of the large object with reference to a free link list;

sequentially allocating a small object, which is less than or the same with the threshold, to a memory block having a storage capacity larger than the threshold; and allocating, when there is a reusable object corresponding to the object in a free reuse list, the object to a specific field of the memory block assigned to the reusable object.

(claim 5) allocating, when there is a reusable object corresponding to a requested object in a free reuse list, the requested object to a specific field of the memory block assigned to the reusable object and deleting the reusable object from the free reuse list; proceeding with a new allocation subsequent to an object ranking on the latest order in the memory block when the free reuse list lacks the reusable object corresponding to the requested object; and adding an object released from the memory block to the free reuse list in correspondence with the released object.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
